# English Indices of Deprivation 2019

## Background

The English Indices of Deprivation 2019 (ID 2019) is the official measure of deprivation for small areas and provides a consistent measure of deprivation across England. Each area is given a deprivation score and a deprivation rank, providing an indication of relative deprivation. It is common to describe how relatively deprived an area is by saying whether it falls within the most deprived 10 to 20 per cent of areas in England.

The ID 2019 has been published at Lower-layer Super Output Area (LSOA) geography since 2004, allowing comparison of data over time. There are 32,844 LSOAs across England including 491 in Derbyshire. The LSOA with a rank of 1 is the most deprived and 32,844 the least deprived. Each LSOA contains on average 1,500 people.

The Indices of Deprivation consist of multiple sets of data. The main data set is the Indices of Multiple Deprivation (IMD 2019) which is published at LSOA level and the other data sets comprise a range of summary measures published for higher geographies including local authority districts, upper-tier local authorities, Local Enterprise Partnerships (LEP's) and Clinical Commissioning Groups (CCG's).

The IMD 2019 combines 39 indicators from seven topic areas (domains) to arrive at an overall deprivation score and rank for each LSOA in England. The seven domains are:

- Income deprivation
- Employment deprivation
- Education, Skills and Training deprivation
- Health Deprivation and Disability
- Crime
- Barriers to Housing and Services
- Living Environment Deprivation.

Scores and rankings at LSOA level are also available for each of the individual domain areas listed above, along with two supplementary indices:

- Income Deprivation Affecting Children
- Income Deprivation Affecting Older People.

## Summary of Key Findings

Overall, deprivation levels in the county appear to have reduced slightly since 2015. Out of 151 upper-tier authorities, Derbyshire now ranks 103 compared to 100 in 2015. However, analysis at the local level shows the small pockets of acute deprivation have worsened in some areas, with 4 additional LSOA's in the county now falling into the top 10% of deprived of areas nationally than in 2015.

The key findings from the Indices of Deprivation 2019 are as follows:

- The most deprived LSOA within Derbyshire remains Hopewell Farm, which lies within Cotmanhay Ward in the Erewash District. It ranks 227 out of 32,844 areas in England, worsening from 249 in 2015.
- The least deprived area has changed from Simmondley in High Peak, to Duffield in Amber Valley, ranked 32,771 of 32,844.
- The number of LSOAs in Derbyshire falling within the 10% most deprived areas in England has risen from 18 in 2015 to 22 in 2019. Approximately 33,616 people live within these LSOAs, representing around 4.3% of the county's population. Chesterfield contains six of these LSOAs, Erewash contains four, North East Derbyshire, High Peak and Amber Valley contain three LSOAs, Bolsover contains two, Derbyshire Dales contains one, and South Derbyshire does not have any.
- The number of LSOAs in Derbyshire falling within the 20% most deprived in England has risen from 60 in 2015 to 64 in 2019. A third of all these lie in Chesterfield (20). Erewash and Bolsover contain 11 each, Amber Valley contains 8, North East Derbyshire 6, High Peak 4, and South Derbyshire 3.
- The number of LSOAs in the least deprived 10% of LSOAs in England has risen from 37 in ID 2015 to 49 in 2019.
- Bolsover is the most deprived of Derbyshire's districts ranking 58 out of 317 local authorities, followed by Chesterfield with a ranking of 86. Derbyshire Dales is the least deprived district, ranking 265 out of 317.
- The district that has improved the most is Erewash, moving up by 19 places in the Local Authority District rankings. Derbyshire Dales has improved its rank position by 7 places, followed by Amber Valley at 5, High Peak at 4, and Chesterfield at 1. The districts that have worsened since 2015 are North East Derbyshire, which has fallen 13 places in the rankings, followed by South Derbyshire at 12, and Bolsover at 3.

- The Derby, Derbyshire, Nottingham and Nottinghamshire (D2N2) Local Enterprise Partnership (LEP) ranks 14 most deprived out of a total of 39 LEP's across England. 10% of D2N2's LSOAs fall within the most deprived 10% across England.
- The NHS Derby and Derbyshire CCG is ranked 102 out of the 191 CCGs, with 7% of LSOAs falling into the 10% most deprived nationally.
- The most deprived domain in Derbyshire is the Education, Skills and Training Domain, with around one fifth of LSOAs (112) in Derbyshire falling within the 20% most deprived areas in England.
- The Health Deprivation and Disability Domain is the second most deprived domain in Derbyshire, with 110 of all 491 LSOAs falling within the most deprived 20% nationally. 37% of these are in Chesterfield, and 19% are in Bolsover, whereas just 1% are in Derbyshire Dales and South Derbyshire.
- Employment is the next most deprived domain in Derbyshire, with 90 of the 491 LSOAs being in the most deprived 20% nationally. This equates to 10% of Derbyshire's working-age population (44,000 people). All districts contain at least one such area.
- Approximately 11% (88,000) of people in Derbyshire are income deprived. There are 72 Derbyshire LSOAs that fall within the 20% most deprived areas across England in the Income Domain and all of Derbyshire's districts contain one such area.
- All of the domains have worsened since 2015 except the Crime and Living Environment Domains. The domain showing the greatest deterioration is the 'Health Deprivation and Disability' domain, which has 23 new areas in the top 20% nationally. The Crime and Living Environment domains have both improved since 2015, with 22 and 17 areas falling out of the most deprived 20% nationally in the respective domains.
- The results for the Barriers to Housing and Services domain differs from the others; of the 36 LSOAs in the top 20% most deprived nationally in Derbyshire, Derbyshire Dales and South Derbyshire each contain 11.
- Of all the domains, the Crime Domain is the least deprived in Derbyshire, with just 1% (6 LSOAs) falling into the 20% most deprived nationally. Of these LSOAs 4 are in Erewash, and the other 2 are in Chesterfield and Amber Valley.
- Approximately 15% (20,000) of children live in families that are income deprived in the county; this has fallen from 17% in 2015.

- Approximately 12% (25,000) of older people in Derbyshire are income deprived; this has fallen from 14% in 2015.

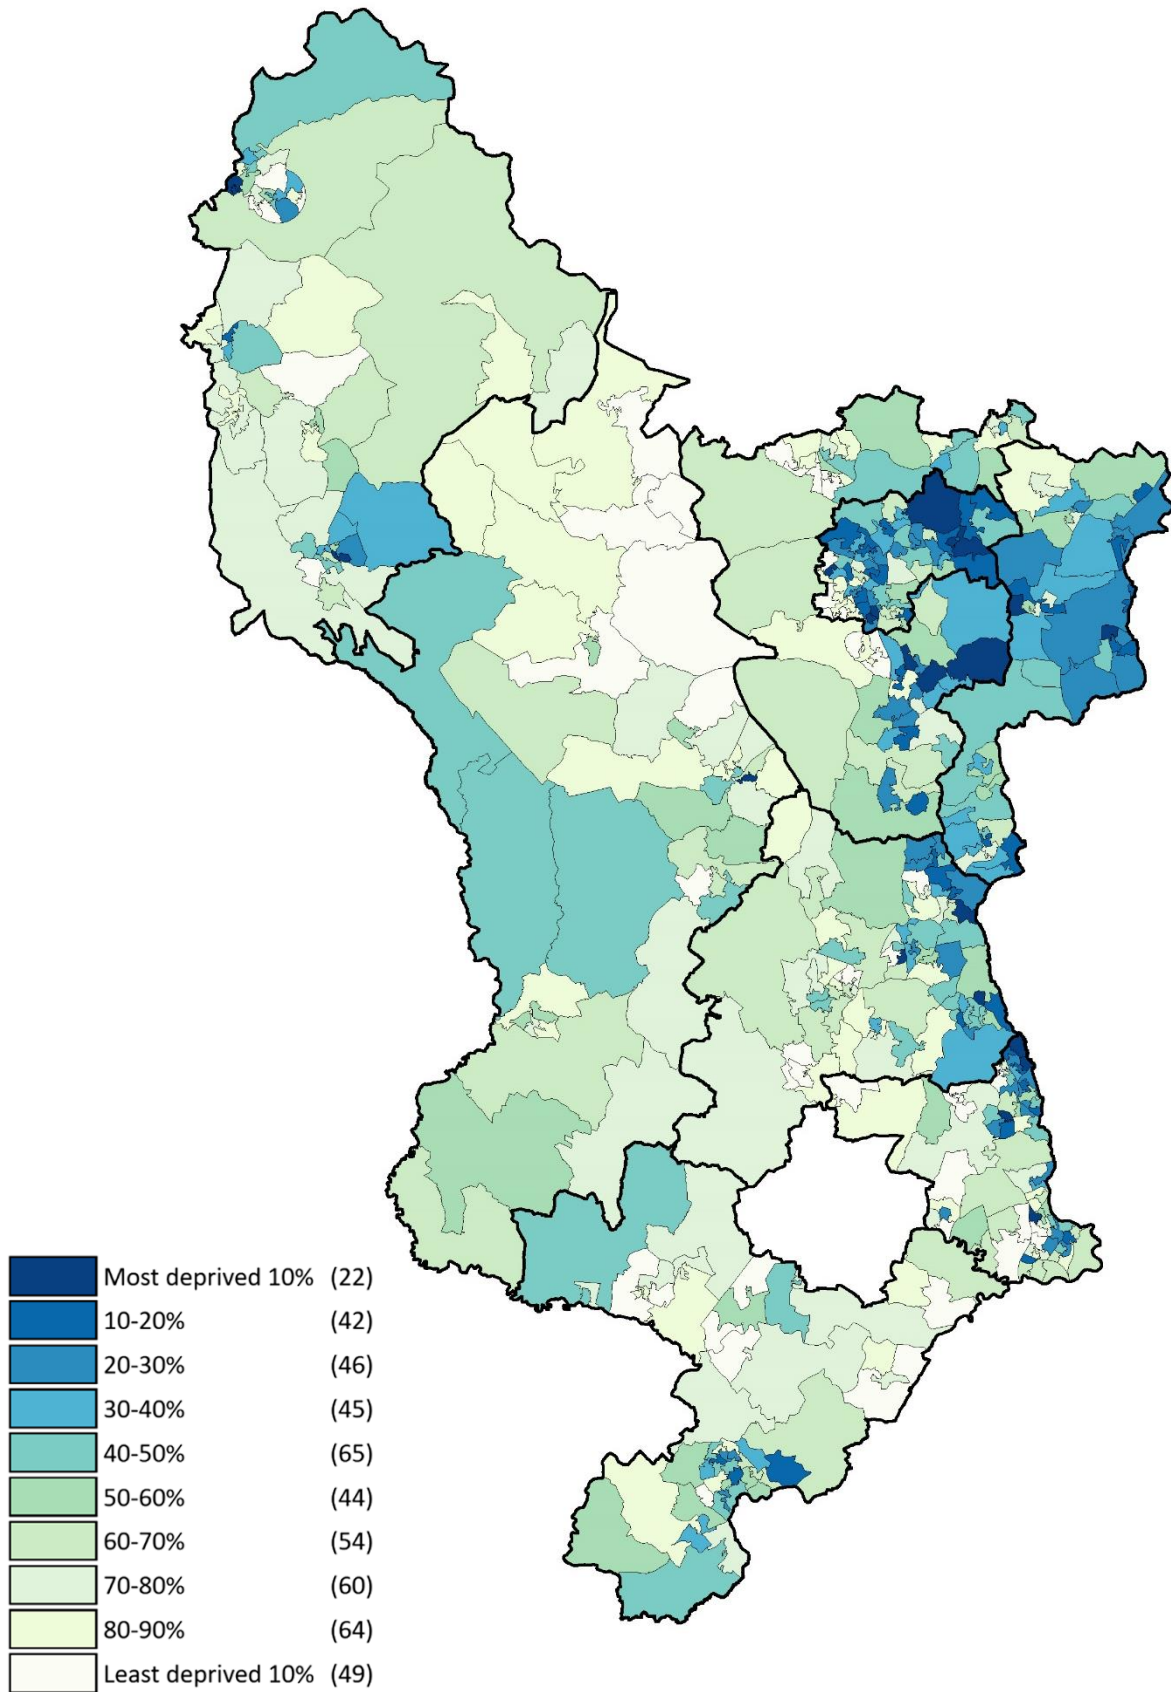

Further detailed maps and tables can be found in the Appendices attached to this report. For interactive maps, infographics, and data spreadsheets please visit the Derbyshire Observatory website<sup>1</sup>.
