# School Cluster Profile 2016

Tibshelf

This profile provides a snapshot of the health and well-being of children in the school cluster* (excluding special schools). It is designed to help the local authority and health services improve the health and wellbeing of children and tackle inequalities.

Secondary School & Primary Feeders within Cluster

'School cluster' is a term used by Derbyshire County Council to describe a secondary school and its primary feeders i.e. primary schools from which the majority of pupils transfer from at the end of Year 6. Some clusters may encapsulate more than one secondary school due to the inclusion of faith schools, which have different admission criteria.

The map below shows the secondary and primary schools within the cluster, in addition to the geographical catchment area.

Key: 🟥 Secondary 🔵 Primary School 🟡 Infant School 🟢 Junior School

1:Tibshelf Community School - A Specialist Sports College, 2:Blackwell Primary School, 3:Bramley Vale Primary School, 4:Heath Primary School, 5:Newton Primary School, 6:Pilsley Primary School (Chesterfield), 7:Tibshelf Infant and Nursery School, 8:Town End Junior School, 9:Westhouses Primary School

Key Points:

• There are 8 primary phase schools feeding Tibshelf Community School (1 Infant, 1 Junior & 6 Primary).

• The schools within Tibshelf have approximately 2,245 pupils on their roll as at Jan 2016.

• Approximately 4.7% of children within the cluster are non-white British and 1.1% do not speak english as their first language.

• The proportion of underweight Y6 pupils, Y1 pupils at expected phonic levels, primary absences and children in poverty are significantly worse than the Derbyshire cluster average.

• Rates of absences at secondary phase (excluding unauthorised absences) are significantly better than the Derbyshire cluster average.

• There are higher proportions children with special educational needs and rates of children in care, need and in a early help intervention.

• Compared to the Derbyshire average, within the geographical boundary of the school cluster there is a significantly higher proportion of housing rented from the Council Housing Association, semi-detached housing and households with dependent children where at least one person has a disability or no adult is in employment.

*School Cluster arrangements as of October 2015 membership, which will be updated as necessary on an annual basis in future releases.
Population Structure- Tibshelf

The first chart below shows the proportion of children enrolled to schools within the cluster by year group and gender compared to the Derbyshire cluster average. The schools within Tibshelf have approximately 2245 pupils on their school roll as at January 2016.
It is important to note that given that some clusters contain two secondary schools and/or a sixth form, the proportion of enrolled pupils within the cluster may vary slightly by year group compared to the Derbyshire cluster average.

The second chart below shows the resident population within the geographical school cluster catchment area by five year age band and gender, compared to the Derbyshire average.

School Cluster (Enrolled Children)

Cluster school population : School census 2015/16

School Cluster (Catchment Resident Pop)

Cluster local population: ONS mid-year estimates 2014

Ethnicity

The table below shows how the ethnicity of children enrolled to schools within the cluster compares to the Derbyshire cluster average. The proportions quoted are based only on children where the ethnicity has been recorded and therefore numbers may not add to the total cluster headcount as quoted above.

Ethnicity	Number	Cluster %*	Derbyshire %*	
White British	2,128	95.3%	93.6%	
White Other	30	1.3%	1.9%	
Asian/British Asian	6	0.3%	1.1%	
Black/African/Black British	9	0.4%	0.3%	
Chinese	6	0.3%	0.3%	
Mixed	50	2.2%	2.5%	
Other	5	0.2%	0.3%	

* proportions calculated using total known ethnicity of pupils

First Language

Children and their families who do not speak English as their first language may face additional challenges at school, which may often require extra support. While the range of proficiency of the English language is unclear, the table below shows how the proportion of children within the cluster who do not speak English as a first language (where known), compares to the Derbyshire average.

First Language	Number	Cluster %*	Derbyshire %*	
English	2,216	98.9%	97.9%	
Other	25	1.1%	2.1%	

* proportions calculated using total known first language of pupils

Cluster Summary - 1   Tibshelf

The spine chart below shows how child health (including related outcomes and wider determinants) within the cluster compares to the Derbyshire and England average. The central black line represents the Derbyshire average and the cluster rates are represented by the circles, which are shaded based upon the statistical significance compared to the Derbyshire average. The range of results for all clusters within Derbyshire is shown as a grey bar. In addition, rates for England are also represented as a grey diamond.

Key:

- 🟢 Significantly better than Derbyshire average
- 🟡 Not significantly different from Derbyshire average
- 🔴 Significantly worse than Derbyshire average
- ⚪ No significance can be calculated
- 🔵 Significantly Higher than Derbyshire average
- ⚪ Significantly Lower than Derbyshire average
